## PRODUCT DATA SHEET UNIFIX FINE

Waterborne uniforming undercoat

**DESCRIPTION** Rough, textured masonry undercoat paint composed of acrylic resin and

aggregates of various sizes for interior and exterior environments. It is suitable for smoothening different surfaces and may be used as a base, connecting surfaces

with old synthetic paint and silicate based mineral paints.

**COMPOSITION** APEO-free product formulated with resins based on vinyl acetate / acrylate in

aqueous dispersion and selected aggregates.

PRODUCT Method Value PROPERTY Coverage Goog

Solid by weight Interior PF25 79-83 % Adhesion to Interior PF16 Excellent

substrates in building

SPECIFICATION Specific weight Interior PF3 1800-1900 g/l

Drying time Interior PF2 recoatable 5h; fully

5 days

SHELF LIFE 1 year minimum, stored in its unopened original can at temperatures between

+5°C and +30°C.

COLOUR RANGE White

DATA

The colour could vary slightly from one production batch to the next; it is therefore

important to finish the job with the same batch.

TYPICAL USE Is used as a connection basecoat between synthetic paints and silicate based

mineral finishes by diluting with Silicap Fix. It can also be applied in one or more layers by diluting it with water. It can be used to even out surfaces that have different types of plaster either it being new or treated with old paint or to roughen smooth surfaces of different material such as plasterboard, skim plaster or plaster. The surface to be treated must be dry and solid (free from loose or flaking

parts). If the surface is friable strengthen it with Murisol or Murisol W.

TOOLS Roller, Brush.

**THINNING** 10-20% by volume with water.

In case of connection primer for mineral paints, dilute to 10% by weight with

Pigmented rough undercoat paint having the following grain size distribution:

Silicap Fix.

**COVERAGE** 3,8-4,2 m<sup>2</sup>/kg

**APPLY** +5°C +30°C

**SPECIFICATION** 

ITEM rough type, fine type, 0.06-0.2 mm. It is ideal for various plasters and old paint to

be applied at an average consumption rate of 250 g/m<sup>2</sup>.

**INSTRUCTIONS**To carry out the work in a proper way, it is needed to strictly follow the instructions for the preparation of the surfaces contained in the CAP Arreghini

Books. This technical information is intended as a rough guide. However, because of the enormous variety of media and application conditions, it is essential to check the suitability of the product and test the effectiveness on a sample. The specification data and technical information have been calculated at +23 °C with relative ambient humidity of 65%. In different conditions the data and the time intervals between the two phases of the above reported coating system can vary.
